## Master the Amharic Fidel:

In the Amharic language there are around 34 Fidel or characters. Each character represents a consonant-vowel combination. Each Amharic character encodes both a consonant sound and a vowel sound together.

In other writing systems like the English alphabet, each letter typically represents either a consonant or a vowel sound on its own. For example, the letter 'b' represents only the consonant sound, while the letter 'a' represents only a vowel sound.

In contrast, the Amharic script uses characters that combine both a consonant and a vowel into a single symbol. For instance, the Amharic character 'ሀ' represents the consonant sound 'h' combined with the vowel sound 'a'. Similarly, 'ለ' represents 'l' + 'a', 'መ' represents 'm' + 'a', and so on.

But don't be afraid that you won't memorize them because of their quantity. You will know them because I will show you the way to learn them easily.

## The 7 facts you should to know about Amharic Fidel:

Knowing these facts will make it easier for you to learn Amharic Fidel.

1. The letters in the first row are all simple letters with little addition to their bodies. They are pronounced like "ኧ" or "eh, e".
2. The Amharic letters in the second row except for "ሩ" and "ሩ" have a small mark on their right side. This symbol makes them read as "u". Example: ሁ Hu፣ ሉ Lu፣ ሙ Mu
3. All the Amharic letters except "ረ ri, ዩ yi and ቢ fi" in the third row have a right-pointing suffix on their right leg. For example: ካ hi፣ ለ Li፣ ሚ, ሰ Si etc. This suffix makes the Amharic letter read as "i".
4. The letters with two or more legs, such as "ሐ/ ha, ለ / la, ሰ/ sa, ባ /ba" in the fourth row, have the shortest leg on the left. That is why they are pronounced as "a". You can look at them now.

5. All the Amharic letters in the fifth row have a ring on their right leg. This makes them read as "ie". For example: **ዚ Hie, ለ Lie, ጫ Mie, ዒ, ሴ, Sie**
6. But the Amharic Fidels in the sixth row are consonant letters. So we need to read them like "U" **ዘ, ል L, ግ M, ስ S, ር R**". For example: "ግስር / **MSR**, which means "Lentil" and "ስድስት / **SDST**" which means "Six". If we add another vowel symbols to these Fidels, their shape, sound and meaning will change. The remaining 6 Fidels are vowel letters. They change their shape and sound due to the addition of vowel letters. (**አ, ኡ, ኢ, ኣ, ኤ, ኦ, ኦ, (a u i a ie o)**)
7. The letters in the seventh row such as "ሆ / **ho**, ሎ / **lo**, ሮ / **ro**, ኖ / **no**" have a ring on the right. Two-legged letters like "ሶ / **so**, ቦ / **bo**, ሸ / **sho**" have the shortest leg on the right. And those with one leg Fidel like ቆ / **Qo**, ቛ / **Cho**, ቶ / **To** have a ring mark on their head. But they are all pronounced as "o".

If you understand these facts well, you can learn and even memorize these Amharic Fidels very easily. Now, when you read the letters below, read them keeping in mind the facts that we have seen above. I will tell you additional facts after you read this table.

## Similar Amharic alphabet:

### ሀ ሁ ለ (H)

There are three **ሀ / H** types Amharic alphabet that have the same sound and meaning but different shapes.

ሀ	ሁ	ሂ	ሃ	ሄ	ህ	ሆ
ሐ	ሑ	ሒ	ሓ	ሔ	ሕ	ሖ
ኀ	ኁ	ኂ	ኃ	ኄ	ኅ	ኆ
Ha	Hu	Hi	Ha	Hie	H	Ho

Only the first **ሀ / h** is commonly used in Amharic.

### ሠ ሡ (s)

There are two types of **ሠ / s** also. They have the same sound and meaning but different shapes.

ሠ	ሡ	ሢ	ሣ	ሤ	ሠ	ሡ
---	---	---	---	---	---	---

ሰ	ሱ	ሲ	ሳ	ሴ	ስ	ሶ
Se	Su	Si	Sa	Sie	S	So

The Fidel "ሰ / s" is we commonly use.

ወደላይ የተገለበጠ ስምል ኤም የሚመስለውን "ሠ" ብዙም አንጠቀምበትም።

**ኦ / ዕ (E)**

ኦ	ኡ	ኢ	ኣ	ኤ	ኦ	ኦ
0	0	ዒ	ዓ	ዔ	ዕ	ዖ
A	U	I	A	Aie	I	O

The first letter "ኦ / A" is the most commonly used. But the second "0 / A" is usually used by Muslims and Tigres, because it is a throaty sound. Amharic does not have an alphabet that can be read by throat. And the Muslims use it to represent the Arabic letter (ع).

**ጥ & ፄ ፅ (Ts)**

ጥ	ጡ	ጢ	ጣ	ጤ	ጥ	ጦ
ፀ	ፀ	ፂ	ፃ	ፄ	ፅ	ፆ
Tse	Tsu	Tsi	Tsa	Tsie	Ts	Tso

But the fact that these same Fidels are rarely used by Amharic speakers does not mean that the Fidels are unnecessary. Because

other ethnic groups like Tigre and the Ethiopian Orthodox Church and Muslims use them.

## 4 (four) Fidels added to Amharic Fidel Gebeta:

### 1. ጵ / p

“ጵ” is a Greek sound, not Amharic. The Fidel was created to represent the Greek letter “π” and its sound. Example:

Πέτρος = ጵጥሮስ = Peter

Παύλος = ጵውሎስ = Paul

Επίσκοπος = ጵጳስ = Bishop

### 2. ኸ / Kh

The first one is “ኸ / Kh”. This Fidel is not Amharic or Geez, but it is **Tigrigna**. People who speak Tigrinya and Arabic use this alphabet a lot. The Fidel “ኸ / Kh” represents the Arabic letter “خ” and is widely used by Amharic speaking Muslims.

ኸ ኸ ኸ ኸ ኸ ኸ ኸ

### 3. "ጥ / p"

The letter "ጥ / P" is not Amharic either. It is an alphabet created to represent English and Italian letters. For example, the nouns "Polis, Pasta, or Vite" do not have other Amharic nouns. That's what we call them in their original language.

<b>ጥ</b>	<b>ፑ</b>	<b>ፒ</b>	<b>ፓ</b>	<b>ፔ</b>	<b>ፕ</b>	<b>ፖ</b>
<b>Pe</b>	<b>Pu</b>	<b>Pi</b>	<b>Pa</b>	<b>Pie</b>	<b>P</b>	<b>Po</b>

#### 4. ሸ is not from the Amharic Fidel also

The letter "ሸ / V" is also a letter inherited from a foreign language.
